

BIKRAM SARKAR

IT Operations & Major Incident & Change Management Leader | 24x7 Offshore Delivery

Sarkarbikram90@gmail.com | +91 98325-92492 | Hyderabad, India | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Production Support and IT Operations leader with 13+ years of experience including 6+ years in 24x7 production support and 5+ years in people management directing an offshore Hyderabad Command Center for highly regulated, consumer-facing digital platforms (web portals, payment APIs) serving 7M+ end users. Single accountable offshore leader for Tier 1/Tier 2 application stability, Sev-1/Sev-2 incident command, cross-tower escalation, and onshore executive stakeholder management. Deep expertise in ITIL/SRE practices, operational governance, and SLA adherence (improved 60%→95%), with a proven record of championing AI- and automation-led L2 operations to eliminate manual triage. Strong Java application production support skills (JVM/APM troubleshooting, stack-trace analysis) combined with hands-on Python/Go automation. Kubernetes operations experience includes monitoring managed AKS and GKE clusters, validating pod, node and deployment health, reviewing Kubernetes events and container telemetry, and coordinating evidence-based L1 triage and L2 escalation for containerized workloads.

CORE COMPETENCIES

Operational Leadership: Single-Point Offshore Leadership • 24x7 Shift & Coverage Optimization • FTE & Vendor/Contractor Coordination • Skill Development & Cross-Training • Operational Governance & Escalation Protocols • SLA/OLA Adherence Incident & Problem Management: Sev-1/Sev-2 Incident Command • Cross-Tower Bridge Calls (Infra, Security, Network, Vendors, App) • Executive SitReps • RCA & Problem Management • Trend Analysis & Repeat-Incident Reduction AI, Automation & SRE: AI-Led L2 Triage • ChatOps Self-Service • Self-Healing Partnerships with SRE • MTTR Improvement via Monitoring Analytics • ITIL v4 • SLI/SLO Practices Application & Platform Support: Java Production Support (JVM, APM, Stack Traces) • Web/Mobile/API Platforms • ServiceNow • Dynatrace APM & Observability Kubernetes Operations: Managed Kubernetes Monitoring (AKS & GKE) • Pod, Node & Deployment Health • Kubernetes Events & Container Logs • CrashLoopBackOff, ImagePullBackOff, Pending & OOMKilled Triage • Resource Utilization • Runbook-Based Escalation • Autosys and Workload Automation (Job Scheduling, monitoring, execution, periodic Health-check of Autosys Production environment).

PROFESSIONAL EXPERIENCE

Technical Lead – Command Center & Production Support | Resolve Tech Solutions | Apr 2023 – Present

Directing 24x7 operations for a US-based highly regulated US utility client (gas & electricity) serving approximately 7M customers; bridge IT Engineering and Business Leadership.

Operational Leadership & Governance

- Provide single-point offshore leadership for 24x7 production support across Tier 1/Tier 2 digital platforms (customer portals, payment APIs, outage tracker, call-center applications); own delivery outcomes for availability, performance, stability and SLA adherence.
- Lead and develop a 10-engineer Hyderabad team across rotational shifts; drive skill development, knowledge depth and cross-training; optimize shift coverage and support readiness; reduced engineer onboarding from 4 weeks to 7 days through structured knowledge management.
- Establish and enforce consistent operational governance, support standards and escalation protocols; improved SLA achievement from 60% to 95% through data-driven decision-making across interdependent support towers.
- Serve as the primary offshore interface for onshore US client leaders, product teams and vendors; deliver daily, monthly and quarterly operational reviews and executive reporting; honored with the "Client Whisperer" Award for client relationship.

Incident & Problem Management

- Act as primary authority for Sev-1/Sev-2 incidents: lead stakeholder bridge calls, cross-tower coordination (infrastructure, security, network, vendors, application teams) and executive communications with clear, concise situation reports.
- Coordinate response to 700+ monitoring alerts/day and 30+ monthly incidents, including 6–7 Sev-1/Sev-2 events; reduced MTTR by 20% through structured triage and bridge discipline.
- Ensure robust RCA and problem management: facilitate blameless postmortems, drive preventive remediation to closure, and reduce repeat incidents by 30% through trend analysis and proactive risk identification.

Java & Digital Platform Production Support

- Direct Tier 1/Tier 2 support for Java-based microservices and customer-facing web portals; use Dynatrace APM to monitor JVM health, analyze Java stack traces, identify memory/GC bottlenecks and connection-pool exhaustion, and coordinate hotfixes/rollbacks with Application engineering teams.
- Monitor API health checks, Payment transaction success rates.

Kubernetes Operations & Monitoring

- Monitor managed AKS and GKE cluster health across production and non-production environments, covering node readiness, pod status, deployment availability, container restarts, namespace health and CPU/memory utilization.
- Perform initial L1 Kubernetes alert validation by reviewing pod conditions, restart counts, Kubernetes events, container telemetry and deployment status; identify conditions including CrashLoopBackOff, ImagePullBackOff, Pending pods, OOMKilled containers, failed health probes and unavailable replicas.

AI, Automation & Continuous Improvement

- Champion AI- and automation-led L2 improvements: architected a governed Human-in-the-Loop AI incident triage POC (LLM log analysis, SOP-driven runbooks, L2/L3 approvals, audit traceability) to reduce manual triage at scale.
- Led requirements and UAT for MS Teams ChatOps bots enabling self-service incident/task creation, deflecting repetitive L1/L2 work; designed conditional ServiceNow reporting workflows with automated scheduled delivery, eliminating 5+ hours/week of manual aggregation.
- Partner with engineering and SRE teams on incident prevention and self-healing capabilities; oversee monitoring for 3,000+ daily AutoSys batch jobs; coordinate Windows/Linux patching, service validation and CAB change activities.

Senior Engineer – Infrastructure Monitoring & L3 Escalation | Wisemen Consulting | Aug 2020 – Mar 2023

- Managed enterprise infrastructure monitoring across multi-cloud environments and served as the escalation point for complex L3 issues.
- Developed Python automation for log parsing and operational reporting, improving visibility into system health trends; led incident response and RCA with preventive fixes.

Technical Support – Enterprise Hardware Diagnostics | Dell Technologies | Aug 2019 – Aug 2020

- Provided enterprise hardware/software diagnostics and automated recurring troubleshooting workflows; earned Customer Champion recognition.

Service Desk Analyst – Global BPO Operations | Wipro Technologies | Mar 2013 – Aug 2019

- Managed L1/L2 ITSM operations in a global enterprise/BPO environment; progressively owned automation and process-improvement initiatives and earned ENU Excellence recognition.

INDEPENDENT ENGINEERING PORTFOLIO

Personal R&D built outside work hours to deepen systems engineering, cloud architecture, and AI-assisted operations.

HITL Incident Triage Platform [Python, Streamlit, LLMs] POC on Governed AIOps tool using LLMs to analyze incident logs and propose runbooks through a Human-in-the-Loop approval state machine. [Project](#)

Synthetic Data Generation IT alert correlation [Python, Streamlit] Generate realistic data for ML testing and development. [Project](#)

Barnacles [Go] Fault-tolerant distributed log aggregation engine exploring high-throughput streaming, backpressure handling and Kafka/ELK-class observability mechanics. [Project](#)

FlowForge [Rust, Tokio, NATS JetStream] Distributed workflow orchestrator implementing the Transactional Outbox pattern for reliable asynchronous task execution. [Project](#)

ObsygnalPulse [Python, Kubernetes, GPU Metrics] AI-driven observability prototype correlating GPU metrics with Kubernetes pod health for ML workloads. [Project](#)

OpenNoteBook [Python, RAG] Local-first RAG application for secure querying of private documents without third-party API data egress. [Project](#)

Airun-profiler [Python, Rust, AIOps] – AI infrastructure performance engineering & GPU FinOps. [Project](#)

TECHNICAL SKILLS

ITSM & Process: ServiceNow, Freshdesk, ITIL, Major Incident Management, Problem Management, Change Management (CAB), RCA, SLA, ChaRM process, Business Communication for Stakeholders.

Application Support: Java (Production Support: JVM, Stack-Trace Analysis, APM), Web/Mobile/API Platforms, SAP CRM, Genesys Contact Center application, Outage Tracker.

Observability & APM: Dynatrace (RUM, Synthetic, APM), Grafana, Prometheus, OpenTelemetry, Azure Monitor, CloudWatch, GCP Cloud Monitoring, LogicMonitor, NNMI

Cloud & Infrastructure: AWS, Azure, GCP, Managed Kubernetes (AKS & GKE), Terraform, Windows Server, Linux/RHEL
Kubernetes Operations: AKS, GKE, kubectl, Cluster/Node/Pod/Deployment Monitoring, Kubernetes Events, Container Logs, Health Probes, Resource Utilization, CrashLoopBackOff, ImagePullBackOff, Pending/OOMKilled Triage, Incident Escalation/

Programming & Automation: Python, Go, Rust, Bash, REST APIs, JSON, Yaml.

Database: Cloud SQL, Oracle, MSSQL

Reliability Engineering: SLI/SLO, Error Budgets, Blameless Postmortems, Runbook Automation, DR/BCP, Toil Reduction

AI-Assisted Engineering: Governed AIOps, LLM Integration, Intelligent Triage, Event Correlation, Human-in-the-Loop Controls, Responsible AI

Leadership: Offshore Team Management, Executive Communication, Vendor Management, Crisis Communication, Succession & Skill Development.

HONORS & AWARDS

- **Client Whisperer Award** – Resolve Tech Solutions (Jul 2025): Recognized for exceptional executive stakeholder management and trust-building.
- **Customer Champion Award** – Dell Technologies (March 2020): Spot Recognition for resolving chronic enterprise escalations.
- **ENU Excellence Award** – Wipro Technologies (Jan 2019): Recognized for contributions to a large-scale Windows 10 migration.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Google Cloud Certified - Professional Machine Learning Engineer
- Dynatrace Verified - Essentials
- Udemy - Kubernetes Administration
- Confluent - Apache Kafka Fundamentals
- Developing a Google SRE Culture | Observability for Platform Engineering
- Simplilearn - Postgraduate Program in DevOps

EDUCATION

- Master of Computer Applications (MCA), University of Mysore — 2024
- Bachelor of Commerce (B.Com), University of North Bengal — 2011
