

BIKRAM SARKAR

DevOps / SRE & Platform Engineering | Cloud | Kubernetes | Observability | Automation

Sarkarbikram90@gmail.com | +91 98325-92492 | Hyderabad, India | <https://bikramsarkar.space> | <https://github.com/sarkarbikram90> | <https://www.linkedin.com/in/bikramsarkar>

PROFESSIONAL SUMMARY

DevOps / SRE and Platform Engineering professional with experience across cloud infrastructure, production operations, reliability engineering, observability, automation, and technical leadership. Hands-on experience across AWS, Azure and GCP environments, managed Kubernetes (AKS/GKE), Terraform, Python, Go, Linux, Dynatrace, Grafana, Prometheus and OpenTelemetry. Lead a 10-engineer 24x7 operations team supporting highly regulated, customer-facing digital platforms serving 7M+ end users. Improved SLA, reduced MTTR by 20%, and reduced repeat incidents by 30%. Strong focus on engineering-led operations, Kubernetes troubleshooting, SLI/SLO practices, DR, automation, AI-assisted incident triage, observability and operational toil reduction.

CORE COMPETENCIES

- Cloud & Platform: AWS • Azure • GCP • Hybrid Cloud • Linux/RHEL • Windows Server • Managed Kubernetes
- Kubernetes & Containers: AKS • GKE • kubectl • Pods • Nodes • Deployments • Health Probes • Container Logs • Resource Management • Production Troubleshooting
- Infrastructure as Code & Automation: Terraform • Python • Go • Rust • Bash • REST APIs • YAML
- Observability & Reliability: Dynatrace • Grafana • Prometheus • OpenTelemetry • CloudWatch • Azure Monitor • SLI/SLO • Error Budgets • DR/BCP
- DevOps & ITSM: CI/CD • GitHub Actions • ServiceNow • Incident Management • Problem Management • Change/CAB • RCA • Runbook Automation
- AI / AIOps: LLM Integration • Intelligent Incident Triage • Event Correlation • Human-in-the-Loop Automation • Responsible AI
- Leadership: 24x7 Operations • Technical Leadership • Executive Communication • Vendor Management • Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Technical Lead – Command Center & Production Support | Resolve Tech Solutions | Apr 2023 – Present

- Lead a 10-engineer 24x7 production operations team supporting highly regulated customer-facing digital platforms serving approximately 7M+ end users across web portals, payment APIs, outage tracker and call-center applications.
- Operate across hybrid cloud and enterprise infrastructure environments, coordinating infrastructure, application, network, security and vendor teams to maintain availability, performance, stability and SLA adherence.
- Monitor and troubleshoot managed Kubernetes environments across AKS and GKE, covering node readiness, pod health, deployments, container restarts, namespace health, resource utilization, Kubernetes events and health probes.
- Perform initial production triage for CrashLoopBackOff, ImagePullBackOff, pending pods, OOMKilled containers, failed health probes and unavailable replicas using Kubernetes events, container telemetry and deployment status.
- Use Dynatrace APM and observability telemetry to monitor JVM health, analyze stack traces, identify memory/GC bottlenecks and connection-pool exhaustion, and coordinate application hotfixes or rollbacks with engineering teams.
- Improved SLA achievement through operational governance, data-driven decision-making, standardized support practices and cross-tower coordination.
- Reduced MTTR by 20% while coordinating 700+ monitoring alerts per day and 30+ monthly incidents, including 6–7 Sev-1/Sev-2 events.
- Reduced repeat incidents by 30% through trend analysis, blameless postmortems, RCA, proactive risk identification and preventive remediation through governed change management.
- Architected a governed Human-in-the-Loop AI incident-triage POC using LLM-based log analysis, SOP-driven runbooks, L2/L3 approvals and audit traceability to reduce manual triage.
- Led requirements and UAT for Microsoft Teams ChatOps automation enabling self-service incident/task creation and reducing repetitive L1/L2 work; designed automated ServiceNow reporting workflows eliminating 5+ hours/week of manual aggregation.
- Oversee 3,000+ daily AutoSys batch jobs and coordinate Windows/Linux patching, production validation and CAB change activities; partner with SRE teams on incident prevention and self-healing capabilities.
- Provide executive operational reporting and stakeholder communications to US client leaders, product teams and vendors; received the Client Whisperer Award for exceptional stakeholder management.

Senior Engineer – Infrastructure Monitoring, Incident & Change Management | Wisemen Consulting | Aug 2020 – Mar 2023

- Managed enterprise infrastructure monitoring across multi-cloud environments and served as the escalation point for L2 infrastructure issues.
- Developed Python automation for log parsing and operational reporting, improving visibility into system health trends; led incident response, change management and RCA & preventive remediation.

Technical Support – Enterprise Hardware Diagnostics | Dell Technologies | Aug 2019 – Aug 2020

- Provided enterprise hardware/software diagnostics and automated recurring troubleshooting workflows; earned Customer Champion recognition for resolving chronic enterprise escalations.

Service Desk Analyst – Global BPO Operations | Wipro Technologies | Mar 2013 – Aug 2019

- Managed L1/L2 ITSM operations in a global enterprise/BPO environment, progressively owning automation and process-improvement initiatives; earned ENU Excellence recognition.

INDEPENDENT ENGINEERING PORTFOLIO

- Airun-profiler | Python, Rust, AIOps — AI performance engineering infrastructure and GPU FinOps project focused on performance and cost signals.
- ObsygnalPulse | Python, Kubernetes, GPU Metrics — AI-driven observability prototype correlating GPU metrics with Kubernetes pod health for ML workloads.
- HITL Incident Triage Platform | Python, Streamlit, LLMs — Governed AIOps POC using LLMs to analyze incident logs and propose runbooks through a Human-in-the-Loop approval state machine.
- Barnacles | Go — Fault-tolerant distributed log aggregation engine exploring high-throughput streaming, backpressure handling and Kafka/ELK-class observability mechanics.
- FlowForge | Rust, Tokio, NATS JetStream — Distributed workflow orchestrator implementing the Transactional Outbox pattern for reliable asynchronous task execution.
- OpenNoteBook | Python, RAG — Local-first RAG application for secure querying of private documents without third-party API data egress.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, Azure, GCP, Hybrid Cloud, Linux/RHEL, Windows Server

Kubernetes & Containers: Kubernetes, AKS, GKE, Docker, kubectl, Cluster/Node/Pod/Deployment Monitoring, Kubernetes Events, Container Logs, Health Probes, CrashLoopBackOff, ImagePullBackOff, Pending/OOMKilled Triage

Infrastructure as Code: Terraform, YAML

Programming & Automation: Python, Go, Rust, Bash, REST APIs, JSON

Observability & APM: Dynatrace (RUM, Synthetic, APM), Grafana, Prometheus, OpenTelemetry, Azure Monitor, CloudWatch, GCP Cloud Monitoring, LogicMonitor, NNMi

SRE & Reliability: SLI/SLO, Error Budgets, Blameless Postmortems, Runbook Automation, DR, Toil Reduction

ITSM & Process: ServiceNow, ITIL, Major Incident Management, Problem Management, Change Management, CAB, RCA, SLA/OLA Management

Application Support: Java Production Support, JVM/APM, Stack-Trace Analysis, Web/Mobile/API Platforms, SAP CRM, Genesys, Outage Tracker

AI-Assisted Engineering: Governed AIOps, LLM Integration, Intelligent Triage, Event Correlation, Human-in-the-Loop Controls, Responsible AI

Databases: Cloud SQL, Oracle, MSSQL

HONORS & AWARDS

- Client Whisperer Award – Resolve Tech Solutions (Jul 2025): Recognized for exceptional executive stakeholder management and trust-building.
- Customer Champion Award – Dell Technologies (Mar 2020): Spot recognition for resolving chronic enterprise escalations.
- ENU Excellence Award – Wipro Technologies (Jan 2019): Recognized for contributions to a large-scale Windows 10 migration.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Google Cloud Certified – Professional Machine Learning Engineer
- Dynatrace Verified – Essentials
- Udemy – Kubernetes Administration
- Confluent – Apache Kafka Fundamentals
- Developing a Google SRE Culture
- Observability for Platform Engineering
- Simplilearn – Postgraduate Program in DevOps

EDUCATION

- Master of Computer Applications (MCA), University of Mysore — 2024
- Bachelor of Commerce (B.Com), University of North Bengal — 2011
