

BIKRAM SARKAR

SRE & Platform Engineering Leader | Cloud Operations | Observability & AIOps | Distributed Systems

Email: Sarkarbikram90@gmail.com | Phone: +91 98325-92492 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [Medium](#)

PROFESSIONAL SUMMARY

SRE and production operations leader with 13+ years of experience supporting resilient, high-volume enterprise environments and leading cross-functional reliability operations. Currently lead a 10-member operations team supporting 1,000+ servers, 6,000+ virtual machines, 52 enterprise applications and services serving approximately 7 million end users across hybrid-cloud environments. Experience includes SLI/SLO definition, major incident response, blameless postmortems, observability, change-risk assessment, runbook automation, ChatOps and governed AIOps. Hands-on technologist building distributed systems and observability platforms in Go and Python, with a strong focus on reducing operational toil and improving MTTR, reliability and production readiness.

SRE & RELIABILITY LEADERSHIP

SRE / Production Reliability • Incident & Problem Management • Major Incident Response • RCA & Blameless Postmortems • MTTR Reduction • Toil Reduction • Runbook Automation • Change Risk Assessment • Observability • AIOps • Hybrid Cloud Operations • Team Leadership & Mentoring • Stakeholder Management

PROFESSIONAL EXPERIENCE

Technical Lead | Resolve Tech Solutions | Apr 2023 – Present | Hyderabad, Telangana, India

Leadership & Production Reliability

- Lead a team of 10 operations engineers supporting 24x7 enterprise operations across hybrid-cloud environments; conduct hiring interviews, performance appraisals, mentoring, 1:1s and task delegation.
- Support production environments consisting of 1,000+ servers, 6,000+ virtual machines, 52 enterprise applications.
- Established SLIs/SLOs for critical services, improving SLA achievement from 60% to 95%; improved MTTR by 20% through operational improvements, incident coordination and automation.
- Reduced production incidents by 30% through proactive monitoring and governance; reduced engineer onboarding time from 4 weeks to 7 days through documentation and knowledge management.
- Participated in yearly Disaster Recovery (DR) Game Days for Business Continuity tests on critical Azure-hosted applications, simulating outages and failovers to validate system resiliency, and overall operational readiness.

Observability, Incident & Change Management

- Coordinate response to 700+ monitoring alerts per day and 30+ monthly incidents, including 6–7 P1/P2 incidents; manage escalation, stakeholder communication and recovery coordination.
- Active member of Problem Management, leading blameless postmortems for major incidents to identify root causes and drive preventive measures and continuous improvement.
- Serve on the Change Risk Assessment team, evaluating business impact, downtime and deployment risk for production changes; integrated historical CI incident data into change submissions to flag high-risk deployments and prevent repeat outages.
- Support hybrid-cloud monitoring across Amazon CloudWatch, Azure Monitor and Google Cloud Monitoring through Dynatrace; monitor enterprise networking through NNMi and coordinate managed network incidents.

Customer-Facing Reliability & Automation

- Direct SRE operations for mission-critical payment gateway APIs, monitor transaction success rates, round-trip latency and security compliance; monitor API health checks and real-time dashboards for anomalous timeouts and bank declines.
- Monitor customer-facing web portals using real-user interaction checks to validate availability and last-mile customer experience; manage outage reporting and incident communications during P1 events.
- Designed and delivered a Human-in-the-Loop incident triage POC combining AI-assisted analysis, L2/L3 approval workflows, SOP-driven runbooks and audit traceability for governed AIOps adoption.
- Automated ServiceNow reporting, AutoSys workflows, executive reporting and email notifications; partnered with automation teams on Microsoft Teams ChatOps bots for self-service IT requests and task execution.
- Coordinate Windows and Linux patching, log analysis, service validation, scheduled maintenance and production change activities; participate in CAB, executive incident bridges, leadership reporting and customer governance meetings.

Senior Engineer | Wisemen Consulting | Aug 2020 – Mar 2023 | Hyderabad, Telangana, India

- Supported enterprise IT operations and infrastructure monitoring across multi-cloud environments.
- Developed Python automation for infrastructure provisioning, log analysis and operational reporting.
- Led incident response and root cause analysis for production issues, reducing recurrence through preventive measures.

Technical Support | Dell Technologies | Aug 2019 – Aug 2020 | Hyderabad, Telangana, India

- Provided advanced technical support for enterprise hardware and software issues and automated recurring diagnostic and troubleshooting workflows to reduce resolution time.

Service Desk Analyst | Wipro Technologies | Mar 2013 – Aug 2019 | Kolkata, WB, India

- Managed L1/L2 IT support operations covering incident triage, escalation and resolution; progressively took on automation and process-improvement initiatives.

Front Desk Executive | Smart Tech Solutions (Authorized Sony Service Center) | Jun 2012 – Feb 2013 | Siliguri, WB, India

- Managed high-volume customer escalations, service requests and follow-ups with technical repair teams to ensure timely resolution.

SELECTED ENGINEERING PORTFOLIO

Barnacles — Fault-tolerant distributed log aggregation and real-time streaming system demonstrating high-volume data pipelines and observability-platform mechanics. [Project](#)

ObsygnalPulse — AI Infrastructure Intelligence Platform to observe, optimize and automate AI workloads across GPUs, Kubernetes and distributed training pipelines. [Project](#)

HITL Incident Triage Platform — Governed AIOps incident-triage POC combining AI-assisted P1/P2 analysis, L2/L3 approval workflows, SOP-driven runbooks, dry-run/execution separation and audit traceability. [Project](#)

AI-Driven Incident Investigation — AI-powered RCA tool correlating logs, metrics and traces to accelerate MTTR. [Project](#)

Synthetic Data Generator — Python/Streamlit tool generating realistic synthetic incident alerts to accelerate ML anomaly detection model training. [Project](#)

HONORS & AWARDS

- Client Whisperer Award – Resolve Tech Solutions: Recognized for strong client relationships, deep understanding of client needs and exceptional service.
- Customer Champion Spot Recognition – Dell Technologies: Awarded by a Director for exceptional customer support and technical problem-solving.
- ENU Excellence Award – Wipro Technologies: Recognized for critical contributions to a large-scale Windows 10 Migration Project and multiple client appreciations.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Google Cloud Certified – Professional Machine Learning Engineer
- Dynatrace Verified – Essentials
- Apache Kafka Fundamentals – Confluent
- Observability for Platform Engineering – Platform Engineering
- Developing a Google SRE Culture – Coursera
- Architecting with Google Kubernetes Engine – Coursera
- Google Cloud Fundamentals – Coursera
- Postgraduate Program in DevOps – Simplilearn

TECHNICAL SKILLS

SRE & Reliability: SLI/SLO/SLA Definition, Error Budgets, Toil Reduction, Blameless Postmortems, Runbook Automation, ChatOps, Disaster Recovery (DR), Chaos Engineering/Fault Tolerance, Change Risk Assessment

Cloud & Infrastructure: AWS, GCP, Azure, Kubernetes, Terraform

Observability: Dynatrace, Grafana, Prometheus, LogicMonitor, NNMi, OpenTelemetry, Azure Monitor, GCP Cloud Monitoring

AIOps & AI: RAG, Local LLMs, Synthetic Data Generation, Self-Healing Systems, Human-in-the-Loop (HITL)

Programming: Python, Go, Bash, Streamlit

Distributed Systems: Apache Kafka, NATS JetStream, DAG Execution, Log Aggregation & Streaming

Automation & ITSM: AutoSys (WCC), Blue Prism, ServiceNow Automation, Microsoft Teams Bots, Incident/Change/Problem Management, CAB, RCA, ITIL

Platforms & Data: Windows, Linux, PostgreSQL, Power BI

Leadership: Team Management, Hiring, Mentoring, Stakeholder Management, Cross-Functional Collaboration

EDUCATION

- Master of Computer Applications (MCA), University of Mysore (2024)
- Bachelor of Commerce (B. Com), Siliguri College of Commerce, University of North Bengal (2011)

COMMUNITY

- Member, Golang Community – Swecha Hyderabad (Feb 2024 – Present): Active participant in the regional Go programming community.
